miSERVER Platform Host

Description

The miSERVER Platform is an all-in-one preconfigured platform for running the miALERT Event Management Software, and the miLINK PBX, as well as additional service integrations including, but not limited to, fire panels, access control systems, and non-miALERT nurse call products.

The miSERVER Platform fits into a standard 2U rackmount, and requires only standard AC power.

The miSERVER platform is supplied with all requested software pre-installed. Software licenses are sold separately. Speak with a miALERT sales representative to customise your deployment. Hot spare and automatic failover options can also be supplied.

Specifications

Unit: 89mm x 482mm x 292mm

Rack Specification: 2U mount, 292mm depth
