Gen2 EVAN Wall Mount Tablet D10

Description

The EVAN system is a full featured Android powered wall mounted tablet device. It can support two-way audio voice and video calls, and calls to the nursing staff can be initiated using the on-screen emergency call function. The EVAN also integrates all wired and wireless miALERT nurse call peripherals (additional hardware required for wireless integration) to allow alerts to be initiated through pull cords, wireless positioning pendants, dry contacts, and numerous other interfaces. All calls will allow for full two-way audio communication with nursing staff.

Custom apps can be deployed, and the EVAN is also fully integrated with the Nexus home theatre system. Power and communication are supplied through PoE over a single Cat 5E cable run.

Features

- Full featured Android tablet
- Emergency call button to initiate alerts
- Built-in speakerphone for two way communication through the nurse call system
- Can support miBUS wired peripherals
- Integrates with Nexus home audio systems
- Powered by POE

Specifications

Unit: 250mm x 181mm x 21mm
